

Unlock Your Future: Oracle Autonomous Database Certification Guide

So, you're thinking about getting your **Oracle Autonomous Database Cloud Professional** certification (also known as the [1Z0-931-23 exam](#))? Great choice! This certification can open doors and show employers you know your stuff when it comes to *Oracle's autonomous database*.

What's Involved in the Certification Exam?

The *1Z0-931-23 exam* tests your knowledge of **Oracle Autonomous Database**. You'll need to know how to:

- Provision and manage *Autonomous Databases*.
- Load and transform data.
- Use various tools for development and monitoring.
- Understand security and performance aspects.

Guidance: Your 1Z0-931-23 Exam Guide

Getting ready for the exam is crucial. Here's a step-by-step approach:

1. **Understand the Exam Objectives:** Oracle provides a detailed list of topics covered. Review it carefully.
2. **Hands-on Experience:** The best way to learn is by doing. Get access to an **Oracle Cloud** environment and practice creating, configuring, and managing *Autonomous Databases*.
3. **Official Oracle Documentation:** Read the official documentation. It's your *primary source of truth*.
4. **Consider Oracle Training Courses:** Oracle offers training courses specifically designed to help you pass the exam.
5. **Use Practice Questions:** Take practice exams to identify areas where you need more study.

Avoid Common Mistakes

Some people search for *1Z0-931-23 exam dumps*. While these might seem like a quick fix, they are often inaccurate, outdated, and can even violate Oracle's exam policies. Focus on learning the material instead! It's better for your career and gives you real skills.

Ace the Test: Taking Tips

Here are a few tips to help you during the exam:

- **Read Carefully:** Understand each question before answering.
- **Manage Your Time:** Don't spend too much time on any one question.
- **Eliminate Incorrect Answers:** Even if you don't know the answer right away, try to eliminate the obviously wrong options.
- **Trust Your Gut:** Sometimes your first instinct is the correct one.

Key Topics You Should Know

Be sure you understand the following concepts for [Oracle Autonomous Database Cloud Professional](#):

- **Data Loading:** Knowing how to load data, transform and use them in your database is important.
- **Security:** Learn about security features and security best practices.
- **Performance Tuning:** You should know how to identify and resolve performance bottlenecks.

After You Pass

Congratulations! You're now an **Oracle Autonomous Database Certified Professional**. Share your achievement on *LinkedIn* and start using your new skills to build amazing things!

The Value of Certification

An **Oracle Autonomous Database Certification** validates your skills and knowledge. It can lead to better job opportunities, higher salaries, and increased professional recognition. It shows that you're serious about your

career in *cloud computing*.

Good luck with your exam!

Real Exam Questions 2025

Below given questions are for demo purposes only. **The full version** is up-to-date and contains actual questions and answers.

Why Choose CertKillers?

Actual Exam Questions: We provide real exam questions updated regularly.

Exam Dumps: Downloadable PDFs with comprehensive questions and answers.

Weekly Live updates: Study Material questions and answers – Live updates.

Practice Tests: Practice tests and VCE PDF to assess your readiness.

Multi-Lingual Support: Full Version products available for download in all popular languages.

Success Guarantee: Pass your exam on the first attempt or get a refund.

Up-To-Date Test Questions: Up-to-Date Test Prep Questions that cover 2025 syllabus.

Instant Download: Instant download after successful payment.

Version: 10.0

Question: 1

You are the admin user of an Autonomous Database (ADB) instance. A new business analyst has joined the team and would like to explore ADB tables using SQL Developer Web. What steps do you need to take?

- A. Create a database user (with connect, resource, object privileges), enable the schema to use SQL Developer and provide the user with the user-specific modified URL.
- B. Create a database user with the default privileges.
- C. Create a database user with connect, resource, and object privileges.
- D. Create an IDCS user. Create a database user with connect, resource, and object privileges.

Answer: A

Explanation:

<https://docs.oracle.com/en/cloud/paas/autonomous-database/adbsa/connect-database-actions#GUID-55BA432E-098A-48ED-B2EA-F2960A9EF586>

To enable a user to access SQL Developer Web, you need to create a database user with the appropriate privileges, enable the schema for SQL Developer Web, and provide the user with the modified URL that includes the schema name. See [Enabling Users to Access SQL Developer Web](#) for more details.

Question: 2

What is the correct way to list all files in the default data pump directory?

- A. By executing `select * from DBMS_CLOUD.LIST_FILES('DATA_PUMP_DIR');`
- B. You cannot list files in the default data pump directory from Autonomous Data Warehouse (ADW).
- C. Log onto ADW server and issue `ls -al` on the command line.
- D. By executing `select * from utl_file . list ( 'DATA_PUMP_DIR ' );`

Answer: A

Explanation:

To list all files in the default data pump directory, you can use the `DBMS_CLOUD.LIST_FILES` procedure with the directory name as the parameter. See [Listing Files in a Directory](#) for more details.

Question: 3

<https://www.certkillers.net>

What REST verb is used to create an Autonomous Database service using REST APIs?

- A. An "INSERT" REST call
- B. A "GET" REST call
- C. A "POST" REST call
- D. A "PUT" REST call

Answer: C

Explanation:

<https://docs.oracle.com/en/cloud/paas/integration-cloud/rest-api/SendRequests>

To create an Autonomous Database service using REST APIs, you need to use a POST method with the appropriate request body. See [Create Autonomous Database](#) for more details.

Question: 4

When using Data Pump to migrate your Oracle database to Autonomous Database, which two objects are imported?

- A. Data
- B. Schemas
- C. Tablespaces
- D. Reports

Answer: AB

Explanation:

When using Data Pump to migrate your Oracle database to Autonomous Database, you can import data and schemas from Data Pump files. You cannot import tablespaces or reports. See [Export Your Existing Oracle Database to Import into Autonomous Database](#) for more details.

Question: 5

What are two differentiators of Oracle Autonomous Database Dedicated Infrastructure?

- A. Users have OS access to the database machine.
- B. Users can customize the maintenance schedule.
- C. It offers greater control and isolation starting at the Exadata cloud infrastructure level.
- D. Users have SYS privileges in the database.
- E. Users can customize the OS stack and add additional packages

Answer: BC

Explanation:

<https://docs.oracle.com/en/cloud/paas/autonomous-database/adbat/index#articletitle>

You can set the maintenance window for an Autonomous Exadata Infrastructure resource when you create it or you can set or change it later. See [Create an Autonomous Exadata Infrastructure Resource](#) or [Change the Maintenance Schedule of an Autonomous Exadata Infrastructure Resource](#).

You can set the maintenance window for an Autonomous Container Database when you create it or you can set or change it later. See [Create an Autonomous Container Database](#) or [Change the Maintenance Schedule of an Autonomous Container Database](#).

Once a maintenance activity is scheduled based on the maintenance window you set, you can manage the actual timing of the activity, even to the point of changing the patch version, applying the patch immediately, or skipping the activity. See [View and Manage Scheduled Maintenance of an Autonomous Exadata Infrastructure Resource](#) and [View and Manage Scheduled Maintenance of an Autonomous Container Database](#).
