

Your Guide to Salesforce App Builder Exam Success

Are you ready to take on the challenge of the **Salesforce App Builder** exam? This guide will provide you with everything you need to know to prepare effectively and boost your confidence. Let's dive into the key aspects that will help you succeed.

Understanding the Salesforce App Builder

The **Salesforce App Builder** is designed to help you create *custom applications* on the Salesforce platform. Understanding its features and functions is crucial for passing the exam. You will learn to create and optimize applications that fit your business needs. For more detailed insights, visit this [resource](#) to enhance your preparation.

The Importance of Salesforce Certification

Getting certified in Salesforce showcases your **skills** and **knowledge**. It is recognized globally and can open doors to new job opportunities. Focus on the areas covered in the certification exam, such as building *custom apps* and using *Salesforce Lightning*.

Basics of Salesforce Development

Knowing the **basics** of Salesforce development is essential. This includes understanding *data models*, how to design *workflows*, and the integration of applications. The more familiar you are with these concepts, the better you will perform on the exam.

Getting to Know Salesforce Lightning

Salesforce Lightning is the modern user interface that enhances user experience. Familiarize yourself with how Lightning components work and how they can be leveraged to create powerful apps. This knowledge is a significant part of the examination.

Creating Salesforce Custom Apps

The ability to create **custom apps** is one of the main components of becoming a great Salesforce App Builder. Learn how to gather requirements, design user interfaces, and deploy your applications within the Salesforce ecosystem.

Study Strategies for the Exam

Effective study strategies can make a big difference. Here are some tips:

- **Use official study materials** to familiarize yourself with exam content.
- **Join study groups** where you can share knowledge and get insights from others.
- **Practice with sample questions** to get a feel of the exam format.

Utilizing Trailhead for Learning

Trailhead is Salesforce's own learning platform. It offers modules and trails specific to the App Builder exam. This is an excellent resource for both new learners and experienced professionals looking to brush up on their skills.

Mock Exams to Test Your Knowledge

Take as many **mock exams** as possible. They serve as a great tool to identify your strengths and weaknesses. This practice will also help you manage your time during the actual exam. Consider checking out this [link](#) for additional mock exam resources.

Exam Day Preparation

On the day of your exam, make sure to get a good night's sleep. Arrive early at the testing center to avoid unnecessary stress. Bring along all required identification and stay calm.

Conclusion: Your Path to Success

By understanding the **Salesforce App Builder**, knowing the importance of **certification**, mastering development, and utilizing available resources, you are on the right path to passing your exam. Remember, consistent practice and a positive mindset are key. Good luck!

Latest Version: 20.0

Question: 1

Cloud Kicks recently implemented the application lifecycle management process to its release management strategy.

Which category handles bug fixes and simple changes?

- A. Patch
- B. Minor
- C. Major
- D. Rollback

Answer: A

Question: 2

Properly installing managed packages helps prevent conflicts with customizations made by customers and partners.

What functionality should be used to set up packages?

- A. Description
- B. Allow sharing
- C. Help setting
- D. Namespace

Answer: D

Question: 3

Universal Containers has a custom picklist called Support Level on the Account object. They would like to show the real-time value of Support Level on all case records.

How should an app builder implement this requirement?

- A. Create a formula field on the Case object using the TEXT function.
- B. Create a formula field on the Account object using the ISPICKVAL function.
- C. Create a Process Builder and use a field update on the Case object.
- D. Create a roll-up summary field using Support Level on the Account object.

Answer: A

Question: 4

Universal Containers is expecting impacts to operations due to increased demand. The executive team will be reaching out to current customers and want to see the number of open cases for the account and parent account.

Which two tools could an app builder combine to display the number of open cases on the account page?

Choose 2 answers

- A. Flow
- B. Workflow
- C. Approval Process
- D. Process Builder

Answer: B, D

Question: 5

An app builder is preparing to deploy a new app from the sandbox to production using change sets.

What two considerations should an app builder keep in mind during this process?

Choose 2 answers

- A. Salesforce Connect automatically establishes a link between environments.
- B. Change sets do not include all components and may have to perform some changes manually.
- C. Users should be logged out of production when receiving inbound change sets.
- D. Transactions will revert if the deployment errors.

Answer: B, D

Question: 6

An app builder is tasked with adding key performance indicators on client pages. They want to see a summary of the number of open Opportunities and the number of won Opportunities for each Account.

Where should the app builder go to build these new rollups?

- A. Lightning App Builder
- B. Account Object
- C. Lightning Object Creator
- D. Opportunity Object

Answer: B

Question: 7

Universal Containers wants to understand return on investment for the latest advertising buy. They currently use a private security model for all objects.

What should an app builder recommend?

- A. Utilize Account Hierarchies and Roll-Up Summary fields
- B. Run an opportunities pipeline report
- C. Change to a public security model
- D. Configure Campaign Hierarchies and Campaign statistics

Answer: D

Question: 8

Accounts at Universal Containers are currently readable by all users but editable only by their owners. Management wants to designate some Accounts as VIP Accounts. Only Account owners should have read access to these VIP accounts.

Which two actions should an app builder take to meet the requirements?

Choose 2 answers

- A. Implement a sharing rule.
- B. Configure a permission set.
- C. Set up an Account Team.
- D. Change organization-wide defaults.

Answer: A, C

Question: 9

Universal Container wants customers to be able to open cases from a public-facing website.

What should the app builder use to enable visitors to the website?

- A. Outbound message
- B. Web-to-case
- C. Screen flow
- D. Email-to-case

Answer: D

Question: 10

Cloud Kicks (CK) wants to quickly insert a list of over 60,000 net new Accounts. The template based on CK's data model was used to populate the list.

Which tool should be used?

- A. Data Loader
- B. A Lightning Object Creator
- C. Import Wizard
- D. Schema Builder

Answer: C

Question: 11

Cloud Kicks (CK) wants to begin socializing and collaborating within Salesforce around customer accounts to discuss various topics. CK would like all company employees to see these conversations.

Which two features of Chatter would meet CK's business needs?

Choose 2 answers

- A. Set up new private Chatter groups.
- B. Set up new public Chatter groups.
- C. Use post action on the Account object.
- D. Use Chatter actions to create tasks to complete.

Answer: B, C

Question: 12

Cloud Kicks wants to know the total value of all won Opportunities for Accounts and display it on the record.

What type of summary should the app builder use in the roll-up summary field?

- A. Count
- B. Q Max
- C. Sum
- D. Min

Answer: C

Question: 13

Ursa Major Solar wants to convert the relationship between Galaxy and Star from a lookup relationship to a master-detail relationship so each Galaxy record can be equipped with a roll-up summary count of Star records.

Which two considerations should be made?

Choose 2 answers

- A. The Star records are all required to have an existing value in their Galaxy field.
- B. The Galaxy object has fewer than two existing master-detail relationships.
- C. The Galaxy object is required to contain existing roll-up summary fields.
- D. The Star object has fewer than two existing master-detail relationships.

Answer: A, D

Question: 14

Universal Containers has two types of applicants, hourly and salary. There are separate record types for each. While all members of the human resource department need to be able to view all applicant records, only the hiring Manager and VP of HR should be able to create salary applicant records.

What should the app builder recommend to meet this requirement?

- A. Update the org-wide default to private and create a sharing rule for the role of recruiting manager.
- B. Create a permission set containing the salary record type and assign it to the appropriate users.
- C. Remove "create" permission for the salary applicant object for everyone except the manager and VP.
- D. Configure the hourly record type as the default and instruct non-management users to accept the default record type.

Answer: B

Question: 15

The DreamHouse Realty (DR) service manager has asked for some improvements in case management to enforce process compliance so that cases are unable to be reverted to an earlier case status, and to ensure that certain fields are required when specific case criteria are met.

What solution should an app builder implement to meet these requirements?

- A. Workflow Rules
- B. Process Builder
- C. A Validation Rules
- D. Activities Component

Answer: C
